EDUCATION

National College of Business Administration and Economics

Bachelor of Science in Computer Science

Cumulative GPA: 3.69/4

Lahore

Oct 2022 - Expected May 2026

Superior Group of College

Intermediate

Percentage: 60%

Lahore

April 2020 - Jul 2021

WORK EXPERIENCE

PSYCH STATION, Lahore.

Technical Support Head

Lahore

Jan 2024 – Present

- Managed and led the web development team, ensuring timely and efficient delivery of high-quality web applications and services.
- Spearheaded the troubleshooting and resolution of complex technical issues related to web development, enhancing overall system reliability and performance.
- Implemented best practices and process improvements in web development workflows, leading to a 25% increase in project efficiency and a significant reduction in downtime.

CORVIT SYSTEM

Devops Intern

Lahore

Oct 2023 – May 2024

- Assisted in managing and optimizing cloud infrastructure on platforms such as AWS, Azure, or Google Cloud, ensuring high availability and scalability.
- Implemented and maintained CI/CD pipelines using tools like Jenkins, GitLab CI, or CircleCI, streamlining the deployment process and reducing deployment time.
- Developed automation scripts using languages like Python or Bash to automate routine tasks, improving efficiency and reducing manual intervention.

PROJECTS

Enterprise Management System

Feb 2024

- Designed and configured complex network topologies using Cisco Packet Tracer, including routers, switches, and VLANs.
- Implemented security protocols and firewalls, significantly reducing potential security threats and ensuring a secure network environment.
- Configured and optimized various routing protocols (OSPF, EIGRP, BGP) to ensure efficient and reliable data routing.
- Diagnosed and resolved network issues, leading to a 20% increase in data throughput and overall network performance.

Devpos Project

Nov 2023

- Successfully deployed a website on Azure Container Instances (ACI) utilizing the Azure Container Registry (ACR) for container management.
- Created a release pipeline and deployed the website to both QA and production environments using Azure DevOps.
- scaled containerized apps using Kubernetes and employed YAML files for deployments.
